How real is your milk?

Preserving the nutritional values, safety, and authenticity of milk

India is the largest milk producer in the world. Milk and milk-based products are an important source of nutrients in the human diet, especially for infants and children. As tastes change and incomes rise, the popularity of dairy products and awareness towards their health benefits as well as safety is growing every day.

Focus on the essentials

Amino acids are the building blocks of protein. It is essential that your dairy cows' needs are met, and methionine is the single most important amino acid for milk production.

Mepron® has the answer: it is the most efficient methionine source for ruminants, delivering 60% metabolizable methionine.

Put the power of Mepron® in your feed – and focus on your essentials.

Krofta India was started in 1983 as a joint Effort with Dr Milos Krofta. He was the founder of Krofta and developed DAF Technology.

- DAF (Dissolved Air Flotation) Technology
The advanced DAF system offered by Krofta does not warrant a separate flocculation tank, flocculation mixer, and flash mixer.
- Krofta Sedicell
24% of the stream is pressurised to about 6 kg/cm² pressure and saturated with air in the patented air dissolving tube.
- TSS/FOG/BOD/COD reduction is achieved through Krofta DAF System

Ananda®

Anandkaro!

A BRAND THAT'S POWERING THROUGH THE DAIRY FOODS INDUSTRY.

Anand Karo! This single ubiquitous slogan defines everything that Ananda stands for – health, goodness, and unbridled joy; brought to life through a basket of fresh, pure, and nutritious dairy products 'directly from farm to fork' – a sentiment, and a mission, that epitomises everything that the brand stands for.

30 years ago, Mr R S Dixit, Chairman, Ananda, started building this legacy with a small retail outlet, a big dream, and a single-minded focus: to deliver products that always put the health and safety of the customer first. By procuring milk directly from farmers, prioritising purity, and maintaining hygiene throughout, he set a precedence that is the standard for Ananda Dairy Foods today. Making it the brand that is touching millions today, and providing people and families with bountiful health and happiness through delicious products.

100% milk-procurement directly from farmers that is processed in a state-of-the-art manufacturing plant within 24 hours to ensure customers get products that are fresh, natural, and hygienic. With several products supplied fresh on a daily basis. Like Ananda Paneer, the No. 1 paneer brand in the market – natural, fresh, and free from coliform and any preservatives, with a taste that is loved from a brand that is trusted.

But what makes Ananda a truly Power Brand is the constant desire to better products, improve standards,

and introduce variants customised for specific needs, like T20 Special Milk, used only by tea making vendors; a first in the dairy industry. Product innovations like Low-fat Paneer, High-protein & High-fat Supreme Milk, and High Protein & Low-fat FIT Milk, catered specifically for consumers further help solidify Ananda's legacy as a brand that practices what it believes in.

Today, Ananda exports to major countries of the world like The United States, Canada, UAE, Sri Lanka, Bangladesh, and are making the products available in many more.

The introduction of Multivac packaging, an alternate distribution model through bikes, and over 100 outlets of Ananda Retail, with more to come; is helping make Mr Dixit's vision a reality: a pan-India presence by 2020, and the largest manufacturer and marketing organisation of paneer.

Along the way, Ananda has been quietly reinventing itself, from a brand new logo to a whole new avatar that is consumer-friendly, socially-buzzing, and culturally-relevant. And now, it's ready to shake up the segment with a 360° campaign that communicates a brand philosophy that stands true for life: **Anand Karo!**

The livestock sector plays an important role in providing livelihood support to more than 8 crore rural households engaged in dairying. India is a global leader amongst dairying nations and produced 203.5 million tonnes of milk during 2020-21 (till December 2021). Value of output of milk is more than Rs. 7.72 lakh crores during 2018-19 at current prices which is more than the value of output of wheat and paddy together.

Indian milk production has experienced strong growth over the last decade, with volume increasing at a CAGR (compound annual growth rate) of 5.3. Due to the impacts of Covid-19, milk production growth in 2020-21 is expected to be lower, at -3%. However, there was a clear and rapid shift in milk collection from the informal to the formal channel at the farm level after lockdown, with farmers delivering more milk in organized collection centers of cooperatives & private companies.

Like other food & agriculture sectors in India, the dairy industry has been impacted by the Covid-19 pandemic. Due to the pandemic, existing trends like the transition from the informal to the formal market & sector consolidation have gained momentum.

Innovations play an important role in Dairy Industry as well as in optimizing resource utilization by farmers. Innovation means an idea, practice or object that is perceived as new by an individual or other in system. The technologies/practices that are developed through research are innovations which may be plants, value added products, new breeds of cattle, new feed supplements & medicines, new technique of doing things etc.

DAIRY IN INDIA-2022, aim to provide valuable information related to Dairy Industry In India & putting them in a single publication needs to be lauded.

I am confident that the book will serve as best information source to every stakeholder as well as aspirants in Dairy Sector.

I trust you will support us with your valuable suggestions to enable us bring the next issue still better than this.

शुभकामना संदेश

भारत का डेयरी क्षेत्र लगभग 70 मिलियन ग्रामीण परिवारों की आजीविका का स्रोत है और 6.0% से अधिक की वृद्धि है। यह पिछले 5 वर्षों से साल दर साल दुनिया में अद्वितीय है। दूध उत्पादन ने 1950 में लगभग 17 मिलियन मीट्रिक टन से वित्त वर्ष 2020 में 198 मिलियन मीट्रिक टन की मात्रा में उछाल दर्ज किया है, जो पिछले वर्ष के 187 मिलियन मीट्रिक टन से अधिक है। देश में दुग्ध उत्पादन में पिछले वर्ष की तुलना में 5.6 प्रतिशत की वृद्धि हुई है। दूध और दूध उत्पाद पोषण सुरक्षा में सुधार के लिए महत्वपूर्ण स्रोत के रूप में उभर रहे हैं, ग्रामीण क्षेत्रों में 9.0% प्रोटीन की मात्रा और शहरी क्षेत्रों में 12.5% प्रोटीन प्रदान करते हैं। सुरक्षित, पौष्टिक और स्वास्थ्य के लिए बढ़ती मांग है - मूल्यवर्धन, उत्पाद विविधीकरण और पूर्ण गुणवत्ता आश्वासन के लिए सुविधाजनक दूध उत्पादों को बढ़ावा देना। दुग्ध उत्पादों की बढ़ती मांग भारतीय डेयरी उद्योग के लिए स्वदेशी और विदेशी दोनों उत्पादों के उत्पादन को आधुनिक बनाने और बढ़ाने का एक बड़ा अवसर प्रस्तुत करती है। इस उभरते हुए परिदृश्य ने डेयरी से संबंधित विभिन्न पहलुओं के बारे में सटीक जानकारी की उपलब्धता को आवश्यक बना दिया है।

मुझे यह जानकर प्रसन्नता हो रही है कि "M/S White Wing Media" Dairy In India Book का 2022 संस्करण प्रकाशित कर रहा है। मुझे विश्वास है कि डेयरी क्षेत्र के मिनी डेटा बैंक का संकलन आधुनिक वैज्ञानिक तकनीकों, शोध पत्रों, नवाचारों डेयरी उपकरणों और डेयरी उत्पादन और प्रबंधन के लिए सर्वोत्तम प्रथाओं के बारे में कई डेयरी सूचनाओं के लिए उत्कृष्ट संसाधन होगा।

"Dairy In India-2022" के बहुमूल्य प्रकाशन के लिए मैं A.K. Goswami और उनकी टीम को बधाई देता हूं और उनकी सफलता के लिए कामना करता हूं

Message

World trade in the sector of dairy products is increasing and has touched 76.7 million tonnes during the year 2019 which is about 10 percent of world milk production. India's share in global dairy exports is less than 1%, in comparison to leading exporting countries. During the year 2020-21, India has exported dairy products for an amount of US\$ Million 201.37 showing a growth of 8% over the last year. However, India has most advantageous position among the five milk producing regions in the world. On the eastern side, most of the countries are milk deficit till Japan including Bangladesh, Myanmar, China, Cambodia, Vietnam, Thailand, Indonesia, Malaysia, Singapore, Philippines etc. Similarly countries in the western side have milk shortages viz Oman, Saudi Arabia, Qatar, Kuwait, Egypt etc. Presently these countries are importing dairy products from countries which are far away and it takes 45 to 60 days of ocean voyage time to reach them and in the process.

However, there are many issues hindering exports of dairy products from India. These are mainly related to pricing, lack of traceability upto the cattle level, prevalence of FMD and other diseases, inability to meet quality standards of overseas markets, various Sanitary and Phyto-sanitary measures (SPS) and Technical Barriers to Trade (TBT) measures in foreign markets etc. These issues are being addressed by all concerned stakeholders to strengthen the supply chain of production and exports in Dairy sector.

It is my great pleasure to convey my compliments and best wishes in releasing this important publication. I hope this publication will definitely help in publicizing the strength of dairy sector not in India only but globally also.
